

Should schools protect kids from cyberbullying?

GETTING ORIENTED

The weekly passage discusses issues related to cyberbullying. Here is some information that might be helpful to students less familiar with the topic.

Cyberbullying Organizations

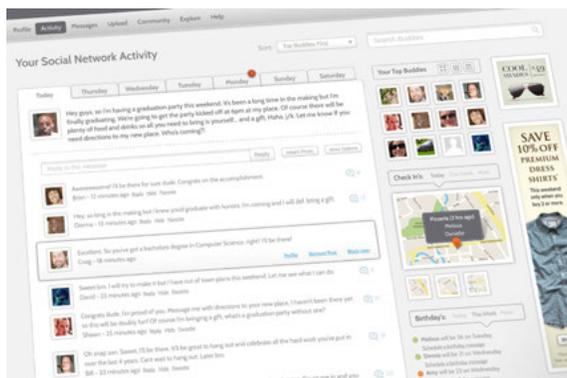

Cyberbullying happens when people use cell phones, e-mail, chat rooms or sites such Facebook to threaten or intimidate someone. There are many different ways that young people can learn about cyberbullying. There are a variety of organizations that offer information and advice. One of these organizations is called WiredSafety. WiredSafety is for people of all ages who experience uncomfortable situations online, on cellphones or on gaming devices. WiredSafety is run by a group of unpaid volunteers who understand how digital technologies work and are abused.

School Climate

Many problems related to cyberbullying begin at school. Schools have become more and more involved in programs that discourage bullying both around school and online. Whereas the word climate is generally used to describe weather conditions, school climate has come to mean the atmosphere that is felt at the school. Most principals realize that school climate is almost as important as school instruction. Young people are encouraged to develop healthy relationships with a variety of students so that they are tolerant or accepting and understanding of the true meaning of a democratic society.

False Profiles

The word profile means describing something in outline form. It can either be drawn or written. When we say that someone created a false profile online, we are saying that the person described himself and his life in a way that is not truthful. Facebook does not allow false profiles on its site. They say that they are committed to investigating and removing false profiles. Libel, or writing things that aren't true about someone, is against the law. However, when free website owners don't ask for names or addresses, tracking offenders can be difficult. Some cases have gone to court, and people have been awarded money for their pain when they have suffered as a result of untrue profiles.

Should schools protect kids from cyberbullying?

EVIDENCE AND PERSPECTIVES

	<i>Some may have this view:</i>	<i>But others may think:</i>
School Leaders	Many school leaders believe they are responsible for providing a healthy school climate for students. In creating this atmosphere they do things to help students feel safe. Many schools have in place a “zero tolerance” policy. This means that teachers punish any students for any rule that is broken regardless of the circumstances. These zero tolerance policies were created to prevent violence and drug abuse in the schools. Many administrators believe that this should extend to cyberbullying since it is a form of emotional violence.	Some school leaders don’t want to take on the responsibility of protecting students from cyberbullying. They fear it will cost too much money. They know they can’t control what goes on outside of school, and they don’t want to risk being sued for something that they can’t really control.
Students	Some students believe that it is the responsibility of the school to protect them from cyberbullying. They feel vulnerable, like they could be easily hurt or harmed and want to know that other students who engage in this kind of cruel activity will be punished. They want to feel safe at school.	Other students do not think they need to be protected by the schools. They feel that they can handle these kinds of things on their own and don’t want the school interfering or getting in the way.
Parents	Parents usually want schools to protect their children from cyberbullying. They consider it part of the duty or job of the school to protect their children from any kind of harm. They see cyberbullying as something that begins at school between students even if the interaction online may continue later at their own homes. They believe that their children aren’t old enough to make mature decisions regarding this kind of rough play.	Some parents may think that the school should do what it can to protect students, but they do not believe that the school has the full responsibility. They realize that the school has a lot of things to consider and many students to deal with. Schools cannot be blamed if school staff members don’t know what is going on with everyone. These parents know that it is their own responsibility to protect their sons and daughters and that they will need to communicate regularly and openly with their children to help them understand these problems.

<ul style="list-style-type: none"> <input checked="" type="checkbox"/> More than 50% of cyberbullying is conducted anonymously. <input checked="" type="checkbox"/> Just as individuals have personalities, so too do schools; a school climate may be thought of as the personality of a school. <input checked="" type="checkbox"/> More and more states are adopting cyberbullying laws requiring schools to adopt and implement cyberbullying policies and procedures. <input checked="" type="checkbox"/> Safe, supportive and civil schools are characterized by norms, values and expectations that support people feeling socially, emotionally and physically safe. <input checked="" type="checkbox"/> Over half of adolescents and teens have been bullied online, and about the same number have engaged in cyberbullying. <input checked="" type="checkbox"/> Well over half of young people do not tell their parents when cyberbullying occurs. <input checked="" type="checkbox"/> Over 80% of teens use a cell phone regularly, making it the most popular form of technology and a common medium for cyberbullying. 	<p>Additional Information for Teachers</p> <p>Find tips for identifying fake online profiling http://abcnews.go.com/Technology/tips-identifying-fake-facebook-profiles/story?id=14379498</p> <p>Cyberbullying Research Center http://www.cyberbullying.us/</p> <p>Learn about improving school climate www.answers.com/topic/school-climate</p> <p>Lots of information about cyberbullying www.wiredsafety.com</p> <p>Ideas for stopping cyberbullying www.stopcyberbullying.org</p> <p>http://www.common sense media.org/cyberbullying</p>

Should schools protect kids from cyberbullying?

ANNOTATIONS FOR TEACHERS

Features of Academic Text: Compressed language

The highlighted sentence in this passage is typical of academic text. In a less formal text, a writer would use several sentences to convey this message. For many students, there are several potential problems in this sentence:

Whereas -- this signal word indicates that there are going to be two contrasting ideas in this sentence.

Cyberbullying -- even though students may have learned what cyberbullying is, this sudden introduction of a new term is typical of academic texts. The scenario in the first paragraph illustrated a concept which is now given a label. This is called a nominalization, which is common in academic writing.

Sixteen-year-old Megan Meier was thrilled when she started chatting with Josh Evans on Facebook. Before she had been sad and lonely, but Josh was good-looking and very kind to her. He even told her that she was his “number one.” However, one day Josh’s messages suddenly turned from nice to cruel. Megan was devastated. She was so hurt and upset by the way he treated her that she committed suicide. Later, Megan’s parents learned that Josh Evans was not a real person. Neighbors had created the false profile to harass Megan.

Whereas bullying has existed in schools for years, cyberbullying is a new method that bullies use to harm their victims. Cyberbullies use text messages, instant messages, email, or sites like Facebook to send harmful messages. Cyberbullying also includes spreading rumors and manipulating photographs online.

Cyberbullying is especially common among middle school students. An estimated 42% of middle school students are involved in cyberbullying either as a bully or as a victim. When a child is having problems in school, cyberbullying can be an **underlying** cause. Students who are bullied online may be afraid to come to school,

participate in class, talk to their peers, or go to recess. When people are afraid, they are less able to learn.

Perhaps schools should get involved to help stop cyberbullying. Some say school police officers should investigate cyberbullying as a crime of **harassment**. Others say teachers should talk with students about cyberbullying. Class discussions could address how to stay safe on the internet, how to handle cyberbullies, and where to get help if you are hurt by cyberbullies.

Some people say schools should only be concerned with what happens at school, not with what happens out of school. They point out that schools have limited resources and do not have the **capacity to adequately** address cyberbullying. Since many of the harmful comments come from **anonymous** sources, teachers and principals do not have time to investigate who the cyberbullies are. Besides, some people say parents are the only people responsible for keeping teens safe on the internet. Do you think schools should protect kids from cyberbullying?

Should schools protect kids from cyberbullying?

GENERATING WORDS

Using words with *-ing* as nouns

We use *-ing* at the end of an action word when we are talking about something that we are doing right now.

→ I am *learning* about words. I am *talking* with my partner about *cyberbullying*.

Wait! *Cyberbullying* ends with an *-ing* and I'm not *bullying* anyone right now. My partner isn't *bullying* anyone either.

We use the *-ing* form of word when we are talking about an activity even if it's something that we or others are not doing right now. In this way, the word *cyberbullying* becomes a thing or a noun.

Investigating is hard because cyberbullies use anonymous e-mail accounts.

Practice:

Here are some Word Generation focus words that are verbs, or action words. All of these words can be used as a noun by adding *-ing*. Choose three of these words and write a sentence for each that uses the word as a noun. Share with a partner.

 example: *Researching* must have been slower before the Internet.

 _____

 _____

 _____

- to debate
- to research
- to extract
- to export
- to conduct
- to confront
- to interfere

DEVELOPING DISCUSSIONS

Fortify a Conversation

Below is a conversation between two people. The casual conversation is the way two friends might talk. The fortified conversation uses school language that is more precise and academic. With a partner, read these two versions of the same conversation. Fill in the missing boxes with either the casual or fortified response.

Topic of Discussion: Many parents feel like they don't have the **capacity** to help protect their children from online **harassment** known as cyberbullying. They feel like they cannot **adequately** deal with the problem because its source is usually something that occurred at school. They want schools do deal with the **underlying** issues that result in cyberbullying. But others think that schools already have too much to do. Do you think schools should protect kids from cyberbullying?

Casual

Schools shouldn't do anything about it.

But what about all that stuff about bullying ruining learning? It messes with their minds.

But schools should do more than just teach things, and a lot of parents don't know what to do about it.

Fortified

In my opinion, schools should not take the time to get involved. They should focus on learning.

*I don't agree, necessarily. I think that bullying limits students' **capacity** to learn. This makes is relevant to schools, whose job it is to foster learning.*

Perhaps. Yet how much can schools get involved in preventing this type of **harassment**. It is online and takes a lot of time to monitor. Schools might put on assemblies that discourage bullying.

Rehearse your fortified conversation. Share with with another pair of students.
