Should Drew follow Coach House's plan?

Coach House had a new plan for the Chargers. He wants Drew and the other guards to pass the ball to the tall players close to the net. House's plan calls for more scoring from Tomas and the other big men, and less scoring from Drew.

Drew isn't buying into the plan, however. While Drew and his friends complain about Coach House, the team keeps losing.

Is House's plan a good one? Should Drew get with the plan?

Check the position that seems best to you.

- House has a good plan and Drew should follow it.
- House's plan won't work. Drew should just play his own game.
